Saad Waseem

Cloud DevOps & Backend Engineer | AWS, Docker, Terraform, CI/CD, Python, Django REST Framework, Linux | Open to Junior & Internship Roles

Lahore, Punjab, Pakistan

Summary

Backend & Cloud DevOps Engineer focused on building, deploying, and maintaining production-ready web applications and cloud infrastructure. My work sits at the intersection of backend development and cloud operations building REST APIs with Python, Django, and Django REST Framework, while also handling the infrastructure, deployment, security, and automation required to run them reliably. Cloud & DevOps I have hands-on experience working with:

- AWS: EC2, S3, RDS, ECR, CloudFront, Route 53, IAM, Cognito, Amplify
- Infrastructure as Code: Terraform
- Containers: Docker, Docker Compose
- CI/CD: GitHub Actions
- Servers: Linux/Ubuntu, Bash, SSH, Nginx, Unicorn
- Security: SSL/TLS, Certbot, DNSSEC
- Orchestration: Kubernetes
- Backend Development: Python, Django & Django REST Framework
- REST API architecture
- PostgreSQL
- JWT authentication
- Django ORM & query optimization
- Serializers and CRUD APIs

Microservice-oriented architecture

Selected Projects

Django Scalable Cloud API Built and deployed a production-oriented Django REST API on AWS using Docker, ECR, RDS PostgreSQL, S3, Nginx, Unicorn, Terraform, and GitHub Actions. Implemented automated CI/CD, containerized deployments, SSL/TLS, DNS management, database infrastructure, and cloud storage.

Serverless Cloud Infrastructure saadops.site Built a cloud-hosted frontend architecture using AWS Amplify, CloudFront, Route 53, and Cognito, with automated deployments and CDN-based edge caching.

Client & Freelance Work I have also delivered projects for international clients, including:

- A 10+ page production website for a US client, deployed to Vercel with CMS integration.
- A browser-based game portal designed to support 500+ concurrent users and eliminate client-side downloads.
- A commercial 2D Unity game for a Portugal-based client, including 15+ AI behavior systems and performance optimization targeting 60 FPS on low-spec hardware.

Currently focused on strengthening my expertise in Kubernetes, advanced

Terraform/IaC, cloud architecture, observability, and zero-downtime deployment strategies. Experience

FlyRank AI

Backend AI Engineer - Intern

August 2026 - Present (2 months)

Currently interning at FlyRank AI as an AI intern, focusing on Backend AI Engineering.

thinkwell

DevOps Engineer

June 2026 - August 2026 (3 months)

Deployed and managed a production Node.js backend on AWS EC2 (Ubuntu) using Docker, PM2, Nginx, and Redis.

Configured DNS, SSL/TLS, reverse proxying, and production environment variables.

Troubleshoot application, build, memory, Redis, PM2, and Nginx issues using server logs and Linux tools.

Created an EC2 AMI and migrated the production server/environment to another instance.

Managed ongoing production deployments and server operations.

International Client

Unity 2D Game Developer (Freelance)

September 2025 - December 2025 (4 months)

Portugal

Worked as a Unity 2D Game Developer for an international client from Portugal on a chef-themed 2D game project.

Responsible for the majority of UI/UX design, including menus, in-game interfaces, and player interaction flow. Implemented level setup, scene integration, and assisted with gameplay logic and bug fixing/debugging.

Collaborated remotely with the client to refine gameplay experience and visuals. Project includes multiple levels, boss fights, and collectible mechanics.

Project duration: ~3 months

Project value: \$500+

Status: Near completion

Game Project

Front-End Web Developer (Freelance)

March 2025 - March 2025 (1 month)

Pakistan

Developed a browser-playable, single-page Minecraft-themed game website. Integrated the game directly into the page using an iFrame, creating an interactive and engaging user experience.

Focused on front-end development, animations, and responsive design, ensuring the game runs smoothly on different devices.

Project duration: ~1 week

Project value: \$100

Scope: Single-page interactive game, playable in-browser

CELESTIAL CHURCH OF CHRIST MIRACLE PARISH

Freelance Web Developer

June 2024 - August 2024 (3 months)

Minnesota, United States

Developed a full-featured, responsive website for the Celestial Church of Christ Miracle Parish, handling all major content areas, including church staff information, events, prayer schedules, and multimedia content.

Designed and implemented multi-page layouts, ensured responsive design across devices, and hosted/deployed the website for live access. Collaborated closely with the client to accurately represent church information and maintain visual consistency.

Managed content integration, image optimization, and page structure, delivering a professional and user-friendly website.

Project duration: ~2–3 months

Project value: \$1,000+

Scope: Multiple pages covering almost all church information and activities

Education

University of South Asia

Bachelor of Science, Computational Science · (September 2023 - September 2027)
